Fisheries and Marine Institute of  
Memorial University of Newfoundland  
155 Ridge Road, St. John's, NL

Why We Should All  
Get in the Boat &  
Learn to Fish!

**Kimberly Orren**

Founder and Project Manager  
Fishing for Success

Fishing for Success is a nonprofit social enterprise that is creating a new pathway for all of us to participate in the shared human heritage of fishing. This small, start-up social enterprise is providing unique tourism experiences and then using the revenue to fund community social good programming like Youth Cod Fishery, Girls Who Fish, and WISH, for example. Fishing is much more than an economic activity and fish is much more than a commodity or even food. It is when we are ready to shift our thinking, that we can see the potential in this simple human activity to empower our children to create a better future for themselves.

Seminar coordinated by the  
Fisheries Graduate Student  
Association

**Bring-Your-Own-Lunch**
